

CIN ByD Migration Self Assessment

CIN Solutions GmbH

Date

Roadmap

Self Assessment

Provide self assessment to map the current solution scope to the future solution scope.

Pre-Assessment

Provide detailed Scope of the future solutions and high-level cost estimation.

Discover

Provide a migration-ready solution design and architecture documentation. This step is important to ensure fast project implementation. Fixed price offer for Engineer and Deploy.

Deliver

Deliver sprints every 2 weeks, show and tell sessions and user acceptance tests after each sprint.

Set to Production Continuous Run

Handover to the customer or introduction of continuous improvements and operation.

Detailed information on current scope

With your input of the BAC configuration, we understand **your current ByD Scope**.

Based on our methodology and analysis we identified

- ❑ the corresponding S/4HANA Scope
- ❑ other required solutions to cover the scope of your current ByD Scope

Your current ByD Solution

Blurred text block, likely a list or table of contents.

Blurred text block, likely a legend or list of categories corresponding to the pie chart.

Your future S4H Public Scope

Blurred text content, likely a list or detailed description of items related to the S4H Public Scope.

Blurred text content, likely a list or detailed description of items related to the S4H Public Scope.

Scope outside S4H Public

Scope to be migrated in addition

Proposed approach and timeline

Phase 1: Assessment for migration of 1st and 2nd generation applications; also out of scope (SAP ERP, SAP CRM, SAP SRM)

Phase 2: SAP S/4HANA

Migration of 3rd generation applications with existing solutions

Migration of 4th generation

Phase 3:

Phase 4: Assessment of migration of 5th generation

Phase 5: Migration of 5th generation

Phase 6: Migration of 6th generation

Phase 7: Migration of 7th generation

Phase 8: Migration of 8th generation

Recommendation

How to proceed?

The first step is to identify the key stakeholders and their interests. This involves understanding the different groups of people who will be affected by the decision and what they stand to gain or lose. Next, it is important to gather all relevant information and data. This includes conducting research, consulting experts, and reviewing existing documents. Once the information is gathered, the next step is to analyze the options and their potential consequences. This involves weighing the pros and cons of each option and considering the long-term implications. Finally, a decision should be made based on the analysis and the interests of the stakeholders. It is important to communicate the decision clearly and to provide a rationale for the choice.
